

Future development conception of Andrejsala is going to be presented at the end of October

"Jaunrīgas attīstības uzņēmums" Ltd. is planning to introduce society with Andrejsala long-term development in "plane", i.e., its territorial zones. Beginning of the building works in Andrejsala also is not too far.

Andrejsala development conception is worked out in cooperation with experts of real estate consulting firm Colliers International from USA, UK and Ireland. Preparation and implementation of the project is planned from year 2005 to year 2020. The project predicts to build in territory of Andrejsala modern, mixed construction district with proportionally developed, diverse elements of city environment – culture and entertainment elements, offices and houses, recreation and green areas, public transport scheme and other town communications.

Andrejsala project will eliminate environmental pollution and provide new development possibilities to business activities. This is also a long-term environment transformation project by which implementation Riga will achieve remarkable investments, arranged environment and infrastructure.

"Jaunrīgas attīstības uzņēmums" Ltd. will participate in international waterfront development conference and exhibition Waterfront Expo 2005, which will take place in Riga from September 27 to September 29.
