

Social infrastructure on Andrejsala is being discussed

On January 19, 2007, SIA "Jaunrīgas attīstības uzņēmums" and the extended working team of the Riga City Council, which deals with the elaboration of proposals regarding the construction and maintenance of new infant schools, met to discuss the securing of social infrastructure on Andrejsala and possible cooperation models with the City of Riga.

Representatives of the Riga City Council were acquainted with the plans of development of Andrejsala and the availability, capacity and features of social infrastructure included in the Master Plan of Andrejsala.

The development of Andrejsala is the first stage of development of the Riga Port City, to be implemented within 10 to 15 years.
