

WaterfrontExpo 2004 conference

Management of "Jaunrīgas attīstības uzņēmums" Ltd. visited WaterfrontExpo international conference – exhibition in Amsterdam last autumn.

„We had one particular reason for this trip – during these three days establish contacts with professional waterfront developers to share experience in future. Waterfront development is complicated but creative process and participants of which are city municipality, general public, architects, city planners, investors.

It was extremely important for us to get to know more about similar already implemented projects like it is in Dublin, Belfast, Amsterdam” commented V. Māziņš.
